

## ABSTRACT

Environmental protection paper slippers primarily applicable for usage in hotels, guesthouses, recreation establishments, and so on, whereby the paper slippers facilitate recycling, and are thus in accord with environmental protection. The paper slipper primarily comprises a sole and a vamp; and is characterized in that: the sole and the vamp are fabricated from corrugated paper and kraft. Two ends of the vamp are bonded to a top surface or a bottom surface of the sole, and an anti-cut structure is defined on a front and a rear edge of the vamp, and frictional wales are further defined on the top surface and the bottom surface of the sole. According to aforementioned structure, apart from the environmental protection paper slippers facilitating recycling, and are thus in accord with environmental protection, moreover, the paper slippers are provided with effectiveness for comfortable wearing, and thereby achieve objective of saving on manufacturing costs.
